Mounting	Ceiling mount
Indoor / outdoor	Indoor
Water resistance	Not water resistant
Listed dimensions	2.8 L × 0.5 W × 0.25 H metres
Additional listed dimension	L650 × H1140 mm

2. Before Installation

- Read this manual before installation and keep it for future reference.
- Confirm that the ceiling location is suitable for the fixture and that the available space accommodates the listed dimensions.
- Switch off the relevant electrical power before beginning installation or handling the wiring.
- Check the fixture and mounting components for visible damage before installation.
- The supplied product information lists an instruction manual as an included component; no separate verified manufacturer manual was available for this document.

3. Installation

1. Turn off the electrical power to the installation point before starting work.
2. Check the ceiling mounting location and confirm that the fixture can be positioned securely.
3. Prepare the mounting point according to the supplied installation instructions and applicable local electrical requirements.
4. Secure the ceiling mounting hardware and attach the chandelier fixture.
5. Make the electrical connection using appropriate electrical installation practices.
6. Check that the fixture is securely mounted before restoring power.
7. Install compatible E14 bulbs.

8. Restore electrical power and check that the four light positions operate correctly.

Important Electrical Safety

Electrical installation involves mains electricity. Use a qualified electrician where required by local regulations or where you are not qualified to perform electrical work. Do not work on the fixture while power is on.

4. Bulb Information

- Bulb base: E14.
- Number of light positions: 4.
- Bulbs are not listed as included with the product.
- Use bulbs that are compatible with the E14 sockets and within the fixture's specified electrical limits.
- The supplied specifications list 40 watts and a maximum light output of 2400 lumens.

5. Placement & Use

The chandelier is specified for indoor use. Listed room applications include bedrooms, dining rooms, kitchens, and living rooms. Position the fixture in a suitable dry indoor location because the supplied specifications identify the product as not water resistant.

6. Cleaning & Maintenance

- Switch off electrical power and allow bulbs and the fixture to cool before cleaning.
- Clean the fixture gently with a soft, dry or slightly damp cloth suitable for the surface.
- Do not immerse the fixture in water.
- Do not use the fixture in wet or outdoor locations because it is not water resistant.
- Periodically check that the fixture remains securely mounted.
- Replace bulbs only after switching off power and allowing the existing bulb to cool.

7. Troubleshooting

Problem: The lights do not turn on.

Solution: Check that the electrical supply is on and that the fixture is correctly connected.

Problem: One light does not illuminate.

Solution: Switch off power and check the corresponding E14 bulb and its connection.

Problem: A bulb does not fit.

Solution: Confirm that the bulb uses the specified E14 base.

Problem: The fixture is unstable.

Solution: Switch off power and check the ceiling mounting and securing hardware.

Problem: The fixture is being considered for an outdoor location.

Solution: Do not install outdoors; the product is specified for indoor use and is not water resistant.
