

LIGHTDECORHUB

LED Chandelier

Modern Sputnik Black & Gold Ceiling Light

Configurations 8-Light / 12-Light	Bulb Base E26	Use Indoor
---	-------------------------	----------------------

Product guide based on the supplied verified product information. This document is not presented as an official manufacturer manual.

1. Product Overview

This modern Sputnik chandelier combines a radiating arm design with a black-and-gold finish and is intended for indoor ceiling installation. LightDecorHub offers the design in 8-light and 12-light configurations.

The fixture uses E26 bulb sockets. LED bulbs are recommended in the supplied product information. Bulbs are not included.

Before installation

- Confirm the selected configuration and color before assembly.
- Verify that the included mounting hardware is present.
- Use compatible E26 bulbs; bulbs are not supplied with the fixture.
- Confirm the correct electrical rating for the selected configuration. The supplied data contains both 40W and 60W references; the exact limit is not independently verified.
- For the ceiling-box electrical connection, follow the applicable installation requirements for your location. A detailed wiring procedure was not provided in the supplied product data.

Documented Quick Specifications

Item	Documented information
Style	Mid-Century Modern / Sputnik
Color	Matt Black and Gold; black and gold options
Material	Metal
Configurations	8 Light and 12 Light
Bulb Base	E26
Power Source	AC
Voltage	110 volts
Indoor / Outdoor	Indoor only; not water resistant
Mounting	Ceiling mount
Height Adjustment	3 extension rods; maximum hanging length 37 inches

2. Parts and Included Components

The supplied product information identifies the following included component.

Component	Status / information
Mounting hardware	Included
Pre-wired branches	Branches are described as pre-wired for assembly
Extension rods	3 included
Canopy / ceiling fixture structure	Referenced in the supplied assembly instructions
Bulbs	Not included

Parts shown above are limited to components explicitly identified in the supplied product information. Other component names or quantities are not provided.

Assembly sequence overview

- Each branch is attached to the central boom.
- The main wire is routed through the extension rods and canopy.
- The hanging configuration is adjusted using the included rods.
- The finished fixture is secured as a ceiling-mounted light using the supplied mounting hardware.

3. Assembly and Installation

The fixture requires assembly. The supplied instructions describe a branch-and-boom assembly followed by routing of the main wire through the extension rods and canopy.

- 1 Prepare the fixture**
Lay out the fixture components and mounting hardware. Verify that the required pieces are present before assembly.
- 2 Attach the branches**
Each branch is already pre-wired. Screw each arm into the central boom as described in the supplied instructions.
- 3 Route the main wire**
Thread the main wire through the selected extension rods and then through the canopy.
- 4 Set the hanging height**
Use the included extension rods to configure the desired hanging length. The supplied maximum hanging length is 37 inches.
- 5 Ceiling mounting**
Install the ceiling light fixture into the ceiling box using the supplied mounting hardware. Detailed electrical wiring steps are not provided in the supplied product information.

Sloped ceilings: the supplied product information identifies the chandelier as suitable for sloped ceilings. Verify the completed mounting position and clearance for your particular ceiling installation.

Electrical note

The supplied information identifies AC power and 110 volts. It does not provide a detailed wiring diagram or connection sequence. Do not use this manual as a substitute for required electrical installation instructions.

4. Bulb Selection and Installation

Bulb base: E26

Recommended light source: LED bulbs

Bulbs included: No

The supplied product information states that the chandelier requires E26 bulbs and recommends LED bulbs. The bulbs shown in product imagery are for display and are not included.

Bulb rating note

The supplied information contains two different wattage references: 40 watts in the Features & Specs section and a statement that ordinary bulbs have a maximum of 60W. Because these figures conflict, the correct allowable wattage for the selected configuration is Not verified. Confirm the applicable rating before fitting bulbs.

Bulb installation

- Use bulbs with an E26 base.
- Choose LED bulbs as recommended by the supplied product information.
- Install bulbs only after the fixture is assembled and mounted according to the applicable installation instructions.
- Do not exceed the verified rating for the selected configuration. That rating is not established by the supplied data.

5. Height Adjustment and Ceiling Applications

Three extension rods are included to adjust the hanging height. The supplied product information specifies a maximum hanging length of 37 inches.

- Use the extension-rod configuration that suits the intended ceiling height and fixture position.
- The product information identifies compatibility with sloped ceilings.
- The product specifications also list swivel-flat ceiling and vaulted-ceiling support as special features.
- Variant-specific installation measurements beyond the documented 8-light dimensions are not provided.

Documented 8-light dimensions: 18.11 in L x 11.61 in W x 20.47 in H.

6. Care and Maintenance

The supplied product data does not provide a detailed maintenance schedule or cleaning procedure. Keep the fixture clean and dry and follow any additional care instructions supplied with the physical product.

- Use the fixture indoors only.
- The supplied water-resistance level is Not Water Resistant.
- When cleaning is required, avoid introducing moisture into electrical areas. A detailed cleaning method was not provided.
- Inspect the visible fixture components after assembly and after any adjustment to the hanging height.
- Replace bulbs with compatible E26 bulbs when required.

7. Troubleshooting

Problem	Possible cause	Solution
A bulb does not light	Bulb may not be correctly installed or may have failed.	Check the E26 bulb installation and replace the bulb if necessary.
Fixture hangs at the wrong height	Extension-rod configuration is not suitable for the desired position.	Reconfigure the included rods within the documented maximum hanging length.
An arm is misaligned	Branch may not be fully seated in the central boom.	Check the arm-to-boom connection during assembly and reposition as needed.
Considering outdoor installation	Fixture is specified for indoor use and is not water resistant.	Use the fixture indoors only.
Mounting hardware appears incomplete	A component may be missing or damaged.	Check the package contents before installation and contact the appropriate support channel if necessary.
Control operation is unclear	The supplied data lists App, Hand Control, and Remote Control fields but gives no operating procedure.	Use only the operating instructions that are verified for the exact purchased configuration.

8. Frequently Asked Questions

What configurations are available?

The design is available in 8-light and 12-light configurations.

What bulb base does it use?

The supplied information specifies an E26 bulb base.

Are bulbs included?

No. Bulbs are not included.

Can the hanging height be adjusted?

Yes. Three extension rods are included, with a documented maximum hanging length of 37 inches.

Can it be used on a sloped ceiling?

Yes. Sloped-ceiling compatibility is identified in the supplied product information.

What rooms are listed for use?

Bedroom, living room, dining room, kitchen island, and foyer are listed. Additional indoor applications include bar and café-style spaces.

Can it be used outdoors?

No. It is specified for indoor use and is not water resistant.

What material is the fixture made from?

The primary material is metal. The supplied material details also identify metal, aluminum, and brass for the shade material.

What are the documented dimensions?

The supplied 8-light dimensions are 18.11 in L x 11.61 in W x 20.47 in H. Dimensions for the 12-light version are Not provided.

What wattage should be used?

The supplied data contains both 40W and 60W references, so the applicable limit is Not verified. Confirm the correct rating for the selected configuration before installation.

9. Technical Specifications and Identifiers

Specification	Value
Brand	RUIYEEY
Model Number	606267276303
