Dimming	Stepless dimming listed
Light output	400 lumens listed per lamp
Use	Indoor only; not waterproof
Product identifier	ASIN B0BV9HZ5VG; UPC 860010468432

Setup

Unpack carefully and inspect the glass, cord, plug, socket and dimmer. Place each lamp upright on a stable, dry indoor surface. Check the product label and any included instructions before connecting power. Use only a compatible E26 bulb within the manufacturer's maximum wattage.

Dimming

Use the cord-mounted dimmer gently to adjust brightness. If the lamp flickers, overheats or behaves unexpectedly, switch it off and unplug it. Check bulb compatibility and contact the seller or manufacturer before further use.

Cleaning and care

Switch off and unplug the lamp, then let the bulb cool. Wipe the glass with a soft, dry cloth. Avoid abrasive pads, harsh chemicals and moisture around electrical parts. Do not use a lamp with cracked glass or a damaged cord, plug or socket.

Safety

Indoor use only; the lamps are not waterproof. Do not immerse, disassemble or modify electrical components. The listed supply is 120V AC, so verify local voltage and plug compatibility before use. Keep cords away from walkways and hot surfaces.

Specification note

Product information was cross-checked against the ONEWISH product page and product-specific marketplace listings. Some marketplace model numbers conflict; identify the pack by its ASIN and UPC and verify electrical ratings on the supplied product label.
