Frequently asked questions

How many lights are in the box?

Ten solar purple pathway lights.

Do I need an outdoor power outlet?

No mains connection is needed at each stake. Each light uses solar charging.

How long should charging take?

The supplied product details state about 6–8 hours in suitable sunlight. This is an estimate.

How long should they stay illuminated?

The supplied product details state around 10–12 hours in summer after charging. Actual runtime varies with conditions.

Can I leave them in rain?

The supplier lists IP65 protection. Use only as directed by the included manufacturer instructions and never submerge the lights.

What is the model number?

CL-XDC. The listed set quantity is 10.

Can they light stairs safely?

No. Treat them as decorative accent lights and use dedicated safety lighting on stairs or uneven paths.

What should I do if my included instructions differ?

Follow the manufacturer instructions supplied with your exact unit and contact the seller if anything is unclear.
